

DO YOU HAVE PAD?
ARE YOU AT RISK FOR PAD?

18 MILLION
AMERICANS SUFFER

FROM PERIPHERAL ARTERIAL DISEASE¹
(COMMONLY CALLED PAD).

TAKE A
STAND
AGAINST
AMPUTATION

WHAT IS PERIPHERAL ARTERIAL DISEASE (PAD)?

- Plaque builds up on the inside walls of the arteries that carry blood from the heart to the legs and arms
- The arteries harden and narrow (a process called atherosclerosis) and blood flow to the legs and feet is significantly reduced
- May also involve hardened and narrowed arteries to the heart and brain, causing an increased risk of heart attack or stroke

**LEFT
UNTREATED,
PAD CAN
LEAD TO
AMPUTATION.**

FACTS ABOUT PAD:

- **One in three people** over the age of 50 with diabetes is likely to have PAD²
- Each year there are **more than 160,000 amputations** performed in the U.S. as a result of PAD³
- Many of these **amputations could be prevented**, with early detection and proactive care
- The amputation rate among patients with critical limb ischemia (CLI), the worst form of PAD is **estimated to be ~25%**⁴

ARE YOU AT RISK FOR PAD? TAKE THIS SHORT QUIZ TO FIND OUT.

Risk factors that increase the chance you may develop PAD.

- Are you 50 years old or older? Yes No
- Do you smoke or did you smoke? Yes No
- Have you been diagnosed with any of the following:
- Diabetes? Yes No
- Chronic kidney disease? Yes No
- High blood pressure? Yes No
- High cholesterol? Yes No

Symptoms that may be signs you have PAD. Do you...

- Experience tiredness, heaviness, or cramping in the leg muscles? Yes No
- Have toes or feet that look pale, discolored or blue? Yes No
- Experience leg or foot pain that disturbs your sleep? Yes No
- Have sores or wounds on your toes, feet, or legs that heal slowly or not at all? Yes No
- Have a leg or foot that feels colder than the other? Yes No
- Have thick, yellow toenails that aren't growing? Yes No

Provide these answers to your doctor so he/she can determine if you need to be screened for PAD.
